

Practical Arts 9

1st Trimester

A close-up, shallow depth-of-field photograph of various carpentry tools scattered on a light-colored wooden workbench. The tools include a hand plane, a chisel, a square, a marking gauge, and a small wooden peg. Wood shavings and dust are scattered around the tools, suggesting recent use. The text "CARPENTRY 9" is overlaid in the center of the image.

CARPENTRY 9

Mark 6:2-3

“When the Sabbath came, he began to teach in the synagogue, and many who heard him were amazed. “Where did this man get these things?” they asked. “What’s this wisdom that has been given him? What are these remarkable miracles he is performing? 3 Isn’t this the carpenter? Isn’t this Mary’s son and the brother of James, Joseph, [a] Judas and Simon? Aren’t his sisters here with us?” And they took offense at him.”

Introduction to Carpentry

1. Differentiate the types of carpentry.
2. Discuss the relevance of the subject.
3. Recall technical carpentry concepts.

Carpentry

- the art and trade of cutting, working, and joining timber. The term includes both structural timberwork in framing and items such as doors, windows, and staircases.
- It is the skill of work of making and repairing wooden objects.

Carpenter

- A carpenter is a position in modern construction work that involves shaping, cutting and installing wood for buildings or smaller structures.
- Carpenters create, fix and install either smaller parts of structures such as cabinets or home additions, or build them outright.
- They handle both indoor and outdoor work using an assortment of tools, making the job versatile as well as physically active.

Types of Carpentry Work

- **Rough carpentry**

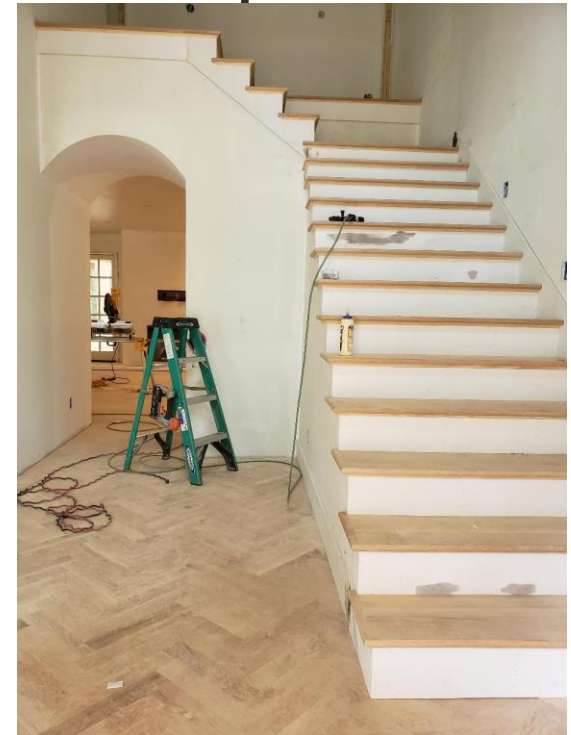

Construct framing, roofing and wooden structures involved in either house repair or initial building. Rough carpentry often does not require a polished finish, but requires knowledge of structural integrity and cost efficiency.

Types of Carpentry Work

- **Finish Carpentry**

This type of carpentry works on areas that will be visible once a building has been completed. Finish Carpenters work to a high level of detail.

Types of Carpentry Work

- **Formwork Carpentry**

This focuses on erecting and dismantling the formwork that is needed for the pouring of concrete. The formwork is the frame that holds the concrete in place while it cures.

Types of Carpentry Work

- **Cabinet carpentry**

- Cabinet makers specialize in carpentry that focuses on building cabinets for kitchens, laundry rooms, bathrooms and other areas of a building.
